School Visit การเยี่ยมชมโรงเรียน

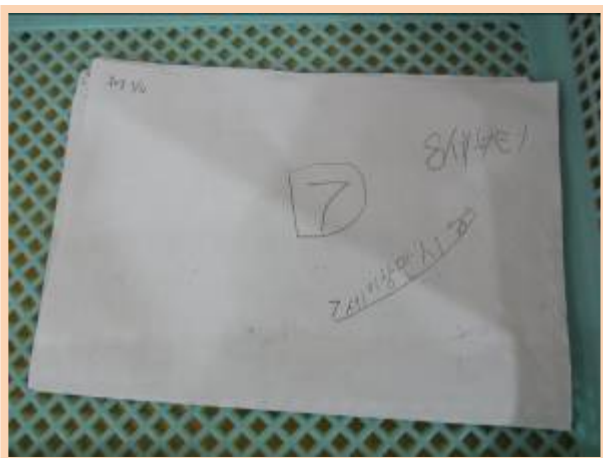

Moonsung Kindergarten, established in 1980, is today comprised of 8 following classes; 2 classes for three-year-old, 3 classes for four-year-old, 3 classes for 5-year-old. Based on 30 years of history, this place continuously researches for the best environment and quality with Wanyoung Choi, the founder of Moonsung Kindergarten, and teachers with abundant experience, profound love, trust, and respect for bottomless possibility of children.

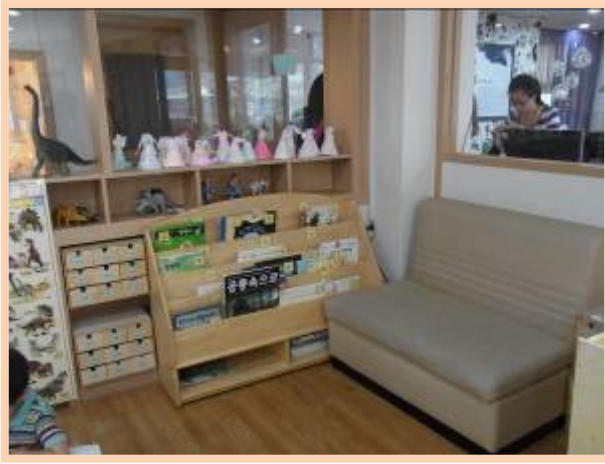

This kindergarten bases on Vygotsky's social constructivist view emphasizing children-centered education and interaction among children or between adults and children. Under such belief, it is employing Reggio Emilia Approach since the year 2000.

This place enforces children's outside activity once a week to have them grow familiar with nature, not to mention strives to provide children enjoyable and meaningful early childhood through rich experience.

A photograph of a 'SCHOOL VISIT LIST' table. The table has a header with the title 'SCHOOL VISIT LIST' and several columns. The columns are labeled: 'No.', 'School Name', 'Address', 'Contact Person', 'Phone', 'Email', 'Website', 'Visit Date', 'Visit Time', 'Visit Purpose', 'Visit Results', and 'Remarks'. The table contains many rows of data, likely representing different schools visited.
